[bennoc 061913 att1.pdf](#)

Mike,

The attached file contains Att 1, Hydro-Chemical Analysis of Waste Water Discharge and Antidegradation Assessment: AEC Bennoc Coarse Coal Refuse Area Ponds 001 and 002, dated September 14, 2012.

On page 5 of the file, which is number page 17 of 62 of Att 1 (must have been excerpted) contains the table of pond chemistry based on the existing Pond 013 (see ref on page 3 paragraph 1). The OEPA water quality standard for TDS is 1500 mg/L. The effluent discharge is 3138mg/L.

If you need any additional information, let me know

Thanks,

Janet Pellegrini, Environmental Scientist
